IDENTIFIERS	*Texas State Technical College

ABSTRACT

In response to concerns of unnecessary duplication in programs offered by Texas community/junior colleges and the Texas State Technical College (TSTC) system, TSTC conducted an examination of curricula, enrollments, and outcomes for both systems. This document provides the second volume of the study, containing the data tables used to generate the analysis presented in Volume I. The following appendixes to Volume I are provided: (1) a description of Texas Higher Education Coordinating Board (THECB) methodology for clustering technical programs, including a 1990-91 list of active technical programs by cluster and state code; (2) 1990-91 reports on enrollment, graduate outcomes, and funding for vocational/technical programs for all two-year public colleges, all Texas community colleges, for metropolitan regions, for non-metropolitan campuses, for TSTC campuses, and for all community colleges by region; (3) 1990-91 reports on enrollment, graduate outcomes, and funding for vocational/technical programs by TSTC region, by college, and by program cluster; (4) statewide program completer statistics for postsecondary technical programs from summer 1989 through summer 1990 for all clusters and for service-related clusters; medical/health care; automotive/heavy mechanics; building systems and construction; applied service and business; export-related; information; energy/environmental; laser/electronics; manufacturing; design and engineering; aerospace; and agribusiness clusters; and (5) frequency distributions of fall 1990 enrollments and 1990-91 graduates of technical education programs in TSTC and state community/junior colleges. LISTING OF COLLEGES BY TSTC REGION

In various reports of this Volume, colleges are reported by "TSTC Region." Regions 1 through 4 encompass the entire state and represent the location of a TSTC campus. Eliminated from these four regions are community/junior colleges located in major metropolitan areas. These community/junior colleges are included in one of six separate regions for reporting purposes. This approach allows a comparison of performance outcomes for the "Balance-of-the-State" within regions 1 to 4 to those of the Metropolitan Regions. Please refer to page 12 for a visual depiction and listing of these regions. The following is a listing of the regions and the colleges contained within these regions:

REGION 1 - TSTC WACO

American Educational Complex
Angelina College
Blinn College
Cooke County College
Grayson County College
Hill College
Kilgore College
McLennan Community College
Navarro College
Northeast Texas Community College
Panola College
Paris Junior College
Temple Junior College
Texarkana College
Trinity Valley Community College
TSTC Waco (excluded when report titles read "Community Colleges in region...")
Tyler Junior College
Victoria College

Weatherford College
Wharton County Junior College

REGION 2 - TSTC HARLINGEN
Bee County College
Del Mar College
Laredo Junior College
Texas Southmost College
TSTC Harlingen (excluded when report titles read "Community Colleges in region...")

REGION 3 - TSTC AMARILLO
Clarendon College
Frank Phillips College
South Plains College
TSTC Amarillo (excluded when report titles read "Community Colleges in region...")
Vernon Regional Junior College

REGION 4 - TSTC SWEETWATER
Cisco Junior College
Howard College At Big Spring
Midland College
Odessa College
Ranger Junior College
Southwest Collegiate Institute
Southwest Texas Junior College
TSTC Sweetwater (excluded when report titles read "Community Colleges in region")
Western Texas College

REGION - AUSTIN
Austin Community College

REGION - DALLAS/FT. WORTH
Collin County Community College
DCCCD Brookhaven
DCCCD Cedar Valley
DCCCD Eastfield
DCCCD College El Centro
DCCCD Mountainview
DCCCD North Lake
DCCCD Richland
Tarrant County Northeast
Tarrant County Northwest
Tarrant County South

REGION - EL PASO
El Paso Community College

REGION - HOUSTON

- Alvin Community College
- Brazosport College
- College Of The Mainland
- Galveston College

- San Jacinto South Campus

REGION - LAMAR

- Lamar Institute of Technology
- Lamar Orange
- Lamar Port Arthur

REGION - SAN ANTONIO

- Alamo Community College District:
  - Palo Alto College
  - San Antonio College
  - St. Philip's College

APPENDIX 1

APPENDIX 1
TECHNICAL PROGRAM CLUSTERING METHODOLOGY

Program performance information received from the Texas Higher Education Coordinating Board and utilized to conduct this study was primarily identified by the Texas HEGIS code. Each HEGIS code has a corresponding program name. Programs were grouped into 'program clusters' according to definitions originally developed by Texas Innovation Network System (TINS) in their work to identify advanced and emerging technologies in 1990. The 'program clusters' adopted from the TINS effort include the following:

- Information Technologies
- Energy and Environmental Technologies
- Medical/Healthcare Technologies
- Laser/Electronics Technologies
- Manufacturing, Design and Engineering Technologies
- Biotechnologies

In order to encompass the remainder of Texas' technical program offerings, several additional 'program clusters' were designated based on generally accepted groupings of programs. These additional 'program clusters' include:

- Aerospace Technologies
- Automotive/Heavy Mechanics Technologies
- Building Systems and Construction Technologies
- Agribusiness Technologies
- Applied Service and Business Technologies
- Related Instruction

The 'Related Instruction' cluster was designated to collect contact hours taught in Related Instruction courses that could not be readily classified into one of the other clusters. Generally, 'Related Instruction' has no declared-major enrollments or graduates.

These twelve program clusters were then classified as to whether they were more related to Service industries or to those industries which more directly support the development and operation of Export industries. The result of this classification is as follows:

Service-Related Clusters	Export-Related Clusters
Medical/Healthcare	Information
Biotechnology	Energy and Environmental
Automotive/Heavy Mechanics	Laser/Electronics
Building Systems & Const.	Manufacturing, Design & Engr.
Applied Service & Business	Aerospace
Related Instruction	Agribusiness

The following pages contain a listing of specific programs which have been assigned to the above program clusters. Each program is identified by its HEGIS code as well as its name.

LISTING OF 1990-91 ACTIVE STATEWIDE TECHNICAL PROGRAMS
BY TINS CLUSTER AND HEGIS CODE

SERVICE-RELATED CLUSTERS

MEDICAL/HEALTHCARE

Hegis Code	Program Name
7821	Vocational Nursing

APPENDIX 2

APPENDIX 2
STATE OF TEXAS - VOCATIONAL/TECHNICAL PROGRAM RESULTS COMPOSITES

Reports found in this appendix contain a wide range of data pertaining to the characteristics and performance of public postsecondary institutions in the state based upon data for the 1990-91 school year. The format of all reports is identical with the exception of the report title, which the reader is cautioned to examine carefully.

The following is a description of the columns of data found in these reports:

COLUMN

(1) Cluster Name - Contains the name of program clusters as discussed in Appendix 1 above. Also contains the names of "major clusters" (e.g. "Service-Related"/ "Export-Related.")

(2) Number of Programs (No. of Pgms) - contains the number of "active" programs for which data is being reported under the identified "cluster name." To be included as an "active," the program must have had reported one or more of the following:
- Fall 1990 Declared Major Enrollment
- Fall 1991 Declared Major Enrollment
- Contact Hours reported taught for the 1990-91 school year
- Graduates reported for the 1990-91 school year

(3) Fall 1990 Enrollment - the number of students who have declared a major and have enrolled in a program of study leading to an Associate Degree or Certificate during the Fall 1990 term.

(4) Fall 1991 Enrollment - the number of students who have declared a major and have enrolled in a program of study leading to an Associate Degree or Certificate during the Fall 1991 term.

(5) 1990-91 Total Graduates - the total number of graduates (Associate Degree and Certificate) for the 1990-91 school year.

(6) 1990-91 Degrees - the total number of Associate Degrees awarded for the 1990-91 school year.

(7) 1990-91 Certificates - the total number of Certificates awarded for the 1990-91 school year.

(8) Graduate Percent Yield - an index which measures the relative productivity of programs (clusters) in producing graduates. Computed by dividing the total number of graduates for the year by the number of students enrolled in the program (cluster) during the previous Fall term and multiplying the quotient by 100.

(9) Prison Flag (P F) - an asterisk alerts the reader that an institution included in the report has reported teaching contact hours in prison for the program (cluster) during the 1990-91 school year. Prison "graduates" (all Certificate level) are included as

"graduates" in columns (5) and (7); however, prison students are not counted as declared major enrollments for the program (cluster). This treatment results in a higher-than-deserved Graduate Percent Yield for the program (cluster). An enumeration of the prison graduates by institution, cluster and program was not readily available. It is our understanding, however, that there were over 1,200 graduates from prison programs during the 1990-91 school year.

(10) 1990-91 Contact Hours-Prison - contains the actual number of contact hours taught in prison programs (clusters). Provided to give the reader some idea how important the prison contact hours (and graduates) are to the overall contact hours and graduates for the cluster and institution(s) for which the data is provided.

(11) 1990-91 Total Contact Hours - contains the total actual number of contact hours taught in the program (cluster). Provides the basis of determining the total "state funding" earned by the institution for each program (cluster). Includes all categories of contact hours including in-district and out-of-district for credit programs only.

(12) Funding Amount @ 77% - the total amount of state appropriated funding "earned" by the total contact hours reported in column (11). This figure is the sum of program by program calculations wherein the program total contact hours are multiplied by the funding rate per contact hour applicable to that program (for FY 1991). Final results are obtained by multiplying the 100% formula funding amount by .77 to provide a comparison with the funding level provided by the 72nd State Legislature.

(13) Formula Funding Rate - the composite rate of all contact hours reported in column (11). This figure is calculated by dividing the total funding amount in column (12) by the contact hours and then dividing the quotient by .77. The subsequent quotient then represents a composite rate for all reported contact hours.

(13) State Funding Per Graduate - this figure represents the total state cost of funding the contact hours from column (11) divided by the total number of graduates for 1990-91 from column (5). It includes no local funding provided to support instructional programming nor any other sources of funds, federal or otherwise.

REGIONS

In addition to composite reports by type of institution (community or technical college) and general locality of the state (Metropolitan Region or Balance-of-the-State), this section also provides composite reports for TSTC Regions. Regions 1 through 4 encompass the entire state and represent the location of a TSTC campus. Eliminated from these four regions are community/junior colleges located in major metropolitan areas. These community/junior colleges are included in one of six separate regions for reporting purposes. This approach allows a comparison of performance outcomes for the "Balance-of-the-State" within regions 1 to 4 to those of the Metropolitan Regions. Please refer to the next page for a visual depiction and listing of these regions. Reports begin on page 13.

APPENDIX 3

APPENDIX 3
STATE OF TEXAS - VOCATIONAL/TECHNICAL PROGRAM RESULTS SUMMARY BY TSTC REGION, COLLEGE, MAJOR CLUSTER AND CLUSTER

Reports in this appendix contain performance characteristics and results for each of the state's 65 public community/junior colleges and for the four campuses of TSTC. Data for each college is contained on a separate page. The format for these reports is identical to that of reports in Appendix 2. Please refer to page 10 for an explanation of column contents.

The reports are sequenced by Region, and the colleges are sequenced alphabetically within each region. Please refer to the Table of Contents at the front of this volume to locate a particular college by page number. At the end of each region is a region total page. A grand total page is the final page of this section.

Report data at the program (HEGIS code) level is available; however, that level of detail is not included in this volume due to lack of space. Information at the major cluster and cluster level is adequate for most analysis needs.

Note: Due to an administrative problem in the reporting of data, enrollments for 52 of Houston Community College's technical programs contain a value of "zero" in the database of the Texas Higher Education Coordinating Board. When the enrollment is zero for a program, it is not possible to compute a "Graduate Yield". Under these circumstances "N/A" is printed in the "Graduate Yield" column.

APPENDIX 4

APPENDIX 4
STATEWIDE PROGRAM COMPLETER STATISTICS - POSTSECONDARY TECHNICAL PROGRAMS DURING THE PERIOD SUMMER II, 1989 THROUGH SUMMER I, 1990

This appendix contains program completer (graduate) data and statistics by ethnicity and "special population" categories for all Texas public community and technical colleges for the period Summer II, 1989 through Summer I, 1990. The data used for this analysis was obtained from the "Vocational Education Post Secondary Institutions (VEPSI) Report, Parts A through D, Summer II 1989 through Summer I 1990." Based on certified data submitted by the postsecondary institutions, the Texas Higher Education Coordinating Board provided this data in electronic form. Specifically, the data utilized from this source includes,

- Total program completers by program (identified by CIP code) for the period Summer II 1989 through Summer I 1990
- Gender of program completers
- Race and ethnicity of program completers
- "Special Populations" completers by category:
  - Disadvantaged (economically and educationally)
  - Single Parents
  - Handicapped
  - Limited English Proficiency (LEP)
  - Sex-Bias

Data from this source was utilized to compare community/junior and technical college outcomes for these categories.

Program completer data from this source was identified by the federal Classification of Instructional Programs (CIP) code. To provide the same type of analysis for this data as was completed for 1990-91 school year completer data (by major cluster and cluster), it was necessary to convert the CIP codes to Texas HEGIS codes. This conversion was accomplished by utilizing a Fall 1990 electronic version of the "Texas Higher Education Coordinating Board Education and Training Clearinghouse Vocational and Technical Program Inventory by Institution" to "crosswalk" the CIP codes to Texas HEGIS codes. This conversion facilitated the type of classifications and analyses for this database as had been accomplished with data from other Coordinating Board sources.

Reports in this section are entitled "Statewide Program Completer Statistics - Postsecondary Technical Programs During the Period Summer II 1989 Through Summer

I 1991." These reports contains statewide program completer data and statistics by gender, ethnicity and special population categories and separated by "Metro Regions," "TSTC System", and the "Balance-of-the-State" community/junior colleges. Reports are grouped in "pairs" with the first report providing detail information and horizontal percentage analysis based on "Total Graduates" for each row. The second report of each "pair" provides percentages of totals for each column divided among "Metro Regions", "Balance of the State" and "TSTC System."

The first report "pair" of this section contains statewide totals for all clusters. Subsequent report "pairs" have sub-titles which identify the sub-grouping of data being reported: Export-Related clusters, Service-Related clusters or the individual clusters (e.g. Information, Medical/Healthcare, Laser/Electronics, etc.). The reader is advised to carefully read the report headings in order to understand report contents.

A general description of the contents of the first report of the "pair" follows:

COLUMNS (from left to right)

(1) Region - contains references to:

a. The community/junior colleges located in one of six major metropolitan regions of the state or the total of data for these regions. Please refer to page 11 in Appendix 2 for an explanation of metropolitan regions and a graphical representation of the areas contained within them. A listing of the community/junior colleges contained within these regions begins on page 116;

b. Balance-of-the-State - the composite results for all community/junior colleges not located in a major metropolitan region;

c. Community College Totals - total data for the six major metropolitan regions and Balance-of-the-State community/junior colleges;

d. TSTC System Totals - composite results for all TSTC campuses combined; and,

e. Statewide Totals - the sum of community/junior college and TSTC campus data.

(2) Total Graduates - total program completers (Associate Degree and Certificate) for the period Summer II 1989 through Summer I 1990.

(3) Total Males - the number (or percent) of Total Graduates from column (2) who are male.

(4) Total Females - the number (or percent) of Total Graduates from column (2) who are female.

(5) Indian - the number (or percent) of Total Graduates from column (2) who are native Americans (American Indians or Alaskan natives).

(6) Asian - the number (or percent) of Total Graduates from column (2) who are of Asian or Pacific Island ancestry.

(7) Black - the number (or percent) of Total Graduates from column (2) who are of African-American ancestry, not of Hispanic origin.

(8) Hispanic - the number (or percent) of Total Graduates from column (2) who are of Hispanic origin.

(9) White - the number (or percent) of Total Graduates from column (2) who are caucasian, not of Hispanic origin.

(10) Handicapped - the number (or percent) of Total Graduates from column (2) who have any disability as defined in section 3(2) of the Americans With Disabilities Act of 1990.

(11) LEP - the number (or percent) of Total Graduates from column (2) who had a "Limited English Proficiency" upon entering their program of study. "Limited English Proficiency" means minimal communication skills (e.g. writing, reading, speaking) in the English language which limits employment opportunity.

(12) Disadvantaged - the number (or percent) of Total Graduates from column (2) who have economic or academic disadvantages and who require special services and assistance in order to enable them to succeed in technical programs.

(13) Single Parent - the number (or percent) of Total Graduates from column (2) who are unmarried or legally separated from a spouse and have a minor child for which the parent has either custody or joint custody; or are pregnant.

(14) Sex Bias - the number (or percent) of Total Graduates from column (2) who graduated from a program in which at least 75% of students enrolled are of the opposite sex.

ROWS

(1) Dallas/Ft. Worth Region - data was summed for the following community/junior colleges located in the Dallas/Ft. Worth area:
- Collin County Community College
- Dallas County Community College District
- Tarrant County Community College District

(2) Houston Region - data was summed for the following community/junior colleges in the Houston region:
- Alvin Community College
- Brazosport College
- College of the Mainland
- Galveston College
- Houston Community College

- Lee College
- North Harris Community College
- San Jacinto Community College District

(3) San Antonio Region - data was included from the Alamo Community College District.

(4) Austin Region - data was included from Austin Community College.

(5) Lamar Region - data was included for the three Lamar locations.

(6) El Paso - data was included from El Paso Community College.

(7) Metro Region Totals - contains the sum of columns for the metropolitan community/junior colleges.

(8) Percent of Totals - expresses the percent of the various columns in relation to the Total Graduates column (2).

(9) Balance of State Totals - data in this row represents the sum of corresponding data for all public community/junior colleges in the state not mentioned above in the listing of metropolitan community/junior colleges.

(10) Community College Totals - data in this row is the sum of the "Metro Region Totals" row and the "Balance of State Totals" row.

(11) TSTC System Totals - contains composite data for all TSTC locations.

(12) Statewide Totals - this row contains the sum of the "Community College Totals" row and the "TSTC System Totals" row.

APPENDIX 5

APPENDIX 5

This appendix contains frequency distributions of student enrollments and graduation in "active" technical education programs offered by the state's public community/junior colleges and by TSTC campuses. The Fall 1990 enrollment and 1990-91 graduates were selected for this analysis since this data forms the basis of comparing "Graduate Yields" in Volume I of this report. A frequency distribution of enrollment by program for the community/junior colleges was compared to that of TSTC programs to determine if there were significant differences in the distribution of enrollment levels of programs. Likewise, the corresponding frequency distributions of graduates by program were compared to determine if there were significant differences in the pattern of graduates of programs between the community/junior colleges and TSTC.

To accomplish this task, the number of programs with Fall 1990 enrollment and 1990-91 number of graduates of 0, 1, 2, 3...40, and greater than 40 were compiled using the SPSS PC+ statistical software package. To provide a better basis of comparison, the number of programs at each level were accumulated from the first "number enrolled," zero, to provide a cumulative number of programs for each "number enrolled" or less. This number (of programs) was then expressed as a cumulative percentage of the total number of programs for the state's community/junior colleges and for TSTC.

The Table on the following page contains the frequency distribution of Fall 1990 declared major enrollments for the community/junior colleges and for TSTC. The first column contains the "number enrolled" (from 0 to 40, plus '40 or greater'). Data for the remaining columns are related to the "number enrolled" in the first column. The second column is divided into three sub-columns which contain the number of programs, the cumulative number of programs and the cumulative percent of programs having the enrollment specified in column 1. For instance, "680 (or 34%) of community college programs had an enrollment of five or less." The second major column contains the same information for TSTC programs.

The Graduation frequency distribution table follows the Enrollment frequency distribution table. Format of the columns is the same. An example of data read from the Graduation frequency distribution table would be "1,400 (or 65%) of community college programs had five or fewer graduates in 1990-91."
